## REPORT.

---

To the accompanying statistical tables your committee adds the following suggestions and observations.

Your committee realizes that inexperience, united with circumstances, have rendered his position not an easy one to satisfactorily fill. He has endeavored to make the work of the school year peaceful and prosperous, and productive of the best attainable results; and it has afforded him much pleasure, while making such efforts, to receive kind assurances of appreciation from teachers and pupils, parents and citizens.

The work of the High School has been rendered less interesting this year than usual, there being no class for graduation, as the exercises of each class since its organization have increased the general interest in its success. It is to be regretted that the larger scholars so frequently leave our schools without availing themselves of their full benefits. The promise is better for the future in the High School, as one of its largest and most interesting classes entered the past year, and a large majority of its members will without doubt complete the course. In such a place as Newmarket it is almost invariably the experience that the attendance decreases as the grade advances.

If the whole town could be united in one district, and all schools therein be graded, it is the opinion of your committee that mutually beneficial results would follow. The outside districts of the town, which have many excellent scholars, would have an interest in the higher schools, and possess advantages which it is now impossible for them to possess. Such a plan might, in his opinion, be a saving of time and money, and of the best results and powers of the schools, to all concerned.

You have a course of instruction comparing favorably with that of any neighboring town or city, good buildings, and sound, practical instruction; and the results to be realized are to be determined by the amount of support received from the hearts and hands of the people. A school is just what the people create and demand that it shall be, and if you would secure the fullest benefits from your schools you must sustain them, with good word and good will as well as with sufficient pecuniary support.

You are told that your schools cost too much. They do cost you perhaps what seems to be a large sum. But why? No unreasonable salaries are paid and no money is wasted. The simple answer is that you have a large number of schools to be supported, and it takes money to do it.

There are those who believe that the old system of a mixed school, six months in the year, produced results superior to our graded system. But if you will look back to those times you will find an entirely different spirit pervaded from that of to-day. Children did not have the leisure time that they now have, and were surrounded by an entirely different atmosphere. Work was the order of life, and the cardinal maxim was, "Be industrious and frugal." When the school was in operation it was the source of common and universal interest and discussion; not, as too frequently of to-day, for purposes of criticism and fault-finding, but for its real good and sacred ends. The school-teacher was prominent in society, and a welcome visitor in every home-circle; consulted and respected by parents and pupils, both at home and at school. Children were taught the strictest obedience to every command, under the pains of severest punishment for transgression. They were taught to respect age and superiority all through life. But the times have changed. The boy of to-day has his every want anticipated and supplied. He comes in most cases from a home of comfort and plenty, and cannot realize that the com-

forts, luxuries and pleasures which he enjoys may not always be as attainable. He is not forced to learn, as were the older men of to-day, the great lesson that the blessings of life are purchased only at the cost of faithful toil and sacrifice. The spirit of change pervades his whole life, and one has only to glance at the present aspect of the subject to be painfully aware of its reality.

The juvenile literature of to-day too frequently presents only false pictures of life, and stimulates a most dangerous spirit of reckless adventure, that, if permitted to grow unrestricted, will be a cause of failure in later life, and should be guarded against.

For this the school system is not responsible, nor for the changes that have taken place in the social and moral ideas of the age. Lay the fault where it justly belongs, but charge the school only with its just debts, and then consider whether less schooling would be an improvement or not. Considering the causes of present condition but a moment you must acknowledge that to shorten the school time would only be to increase these evils. The schools give a safer training than the streets, and the more school the less idleness. In such a town as Newmarket this fact is very plain. Close your schools, and matters which are bad enough at present will then be worse.

It is urged by others that the graded system is a tiresome routine which disheartens the scholar for all study, producing habits of indolence and morbid inattention; that the scholar does not feel the interest he formerly did, and only cares to attain such a degree of proficiency as will insure his promotion and permit him to go along. The answer is, that there should be deeper and more unprejudiced interest at home and with parents, in stimulating and nurturing ambition and pride; inducing the child to make greater efforts for leadership in his class and school; and thus reinstate something of the former degree of home interest, to which your committee has referred. Do this, not only in this particular, but by your frequent presence in the school-room, and by earnest co-operation with teachers. The graded system is every where acknowledged to be the best adapted to our times and needs.

Another charge is, that your schools are too long, and are a cause of weariness and poor health to the pupils. To this the answer is most simple. All will admit that it is easier for a child, or for a man, to do a required piece of work in a reasonable length of time than in too short a period. So it is easier, safer and better for a pupil to complete a required course of study in thirty-six

weeks than to attempt to half do it in thirty or less. He will come out in better health and condition every way, regardless of the proficiency to be thus gained. From every standpoint your town and surroundings are made better by your school; and let all remember that every dollar invested in the support of education is the best possible investment for every business and pleasure of your children in years to come. We labor necessarily under many disadvantages, but let us increase and perpetuate, not diminish, the powers for good at our command; and to take the school from our midst, or to cramp and cripple its work, would be to remove or injure the best and strongest power we have to fit youth for responsible and worthy manhood. Do not stint and starve a noble cause, nor send the children of your town out into life without the shielding protection and fortunate opportunity afforded them by education, but rather strive to unite every instrumentality bearing upon the best success of your schools, and generously support them.

### PROMOTION AND ATTENDANCE.

Your committee has created a standard of rank by which promotions may be determined, requiring seventy per cent. of correct answers upon written examinations for entry to the High School, and for promotion from class to class therein; and a like standard of sixty-six per cent. in the Grammar and Intermediate departments. As exceptions to this rule can be justly permitted only in extreme cases where apparent injustice would be done by its enforcement, it becomes necessary for pupils to be regular in attendance, and prompt and efficient in their test examinations.

Your committee has endeavored to place each scholar in the class and school best fitted to his condition, and would urge the advantages to be gained by regular and punctual attendance and attention to the exercises of the school, that a standard may be maintained which will do injustice to none and at the same time determine questions which are frequently disagreeable to determine.

Scholars now see plainly what is necessary to secure their promotion. Let them meet the requirements and be certain of the result. Parents should consider that it is no favor to their children to push them faster than they are fitted to go, but an injury; and the best judges of their attainments are their teachers and school officers.

## TEXT BOOKS.

Little change has been made in text books the past year. Alden's Manual of Civil Government has been replaced by Young's Government Class-Book, which is a much superior and more comprehensive work, and is really one of the most valuable of text books to give young people true ideas of life, of the rights, duties and obligations of citizenship and of the government and laws under which we live.

## TEACHERS AND DISCIPLINE.

There have been few changes in teachers during the year, which is fortunate, as a good teacher is not easily replaced. In the selection of teachers, great care should be used, as a teacher of children has a powerful influence over them, and one that lasts a life-time. You may congratulate yourselves that your children are placed under the charge of those who will faithfully guard their best interests, and are worthy of your fullest confidence.

No teacher or school officer can make a school a success, nor earnest pupils and faithful men and women out of children, without the co-operation and hearty support of parents and people, and unless acting in harmony with the current of society, and the moral atmosphere of their homes. A teacher's position demands all the reserve power at his command, even with the approval and full support of the people.

Less trouble generally comes from the pupils themselves, than from neighborhood quarrels and personal prejudices. Let every one "build over against his own house," manifest his moral courage and not his cowardice, giving the schools his fostering support, and hearty good will, and they will recognize a power indeed.

The interests of your schools, and of the young, are of vital importance to the future welfare of the community, and should receive the candid support of every citizen, regardless of personal prejudice, or private animosity. There is some excuse for children playing in dirt together, for men there is none.

Questions of discipline necessarily arise, demanding careful consideration, and prompt, decisive action, but they rarely result in serious difficulty, if not meddled with by those not interested, and if treated in a spirit of sincerity for the child's best good. Your committee believes in a strict and impartial school government; such as a wise, judicious and faithful parent would exercise in the family, and which will unfold in every child the best qualities, and stimulate the highest principles and purposes.

Your schools are created first for the scholars, and next for the people who support them. Their great end and aim is to educate the young for fitness for life and its realities; and to do this, thorough discipline must be maintained in every department. Children have hearts tender and true, and possess the noblest thoughts and aspirations of life. They are quick, conscious, and sensitive, and can be controlled in a majority of cases by an appeal to their better natures, to their pride and personal honor, and an appreciation of their real merits. No teacher is competent to teach, who cannot find in every pupil some good, and a teacher who hates a pupil should never be permitted to instruct one. Children's friendships are quickly formed, and principles and impressions early and deeply rooted, soon developing into good purposes and noble graces, or base passions; and in creating and maturing these, a teacher has much to do. The true teacher should always be the child's best friend and adviser.

It is thought to be unnecessary to publish the course of study for the different schools, as little change has been made since the last report. The rules and regulations having been slightly changed, will be published, following this report.

With gratitude for kindly sympathy and assistance, your committee respectfully submits his work and this report, with best wishes for the future of your schools, as for every cause of public good, that your children may be successful in the best aims of life, and an honor to yourselves, and the community, and to accomplish which your committee would spare no efforts, and value no sacrifice.

Whatever else you may do, stand by your schools, and their sacred ends; support, encourage and sustain them; and you will find your reward in results above the value of figures; in crowns of success for your children to wear, that no one can take from them.

ELISHA A. KEEP,

*School Committee.*

Newmarket, N. H., March 1, 1882.

# RULES AND REGULATIONS

FOR THE

## Public Schools.

---

- I. The Public Schools of Newmarket shall be divided into the following grades: Primary, 1st and 2d, Intermediate, Grammar, 1st and 2d, and High.

### SCHOOL HOURS.

- II. All the schools shall, throughout the year, commence the morning session at 9 o'clock, A. M. In District No. 1, during the summer season, the afternoon session shall be from 2 to 5 o'clock, P. M.; and from the middle of October to the close of the year, from 1.30 to 4.30 o'clock, P. M., with suitable recesses for each session. During the summer season there shall be no afternoon session on Wednesdays and Saturdays; and during the winter season there shall be an afternoon session on Wednesdays, and no forenoon session on Saturdays. In Districts numbers 2, 3, 4, 5 and 6, the sessions shall be arranged, as, in the judgment of the School Committee, circumstances may require. Teachers may keep one continuous daily session with suitable recesses, when the condition of the weather seems to demand it; but otherwise, are not to dismiss their schools, nor change the school hours, except by permission of the School Committee.

## ATTENDANCE AND GENERAL DUTIES OF TEACHERS.

- III. Teachers are required to be at their respective school rooms at least ten minutes before the commencement of the sessions both morning and afternoon. A strict observance of the hours of commencing and closing is required. No teacher shall be absent from the school without the consent of the School Committee. No teacher shall ever introduce a substitute into the school without the express sanction of the School Committee. The teachers are required to observe and carry into effect all the regulations of the School Committee in relation to the instruction, discipline and general management of the schools, and to consult him freely on occasions of serious difficulty, to the end that all parties may work in unison and be of mutual support.

## OPENING EXERCISES.

- IV. The morning session shall be opened with the reading of the Scriptures.

## SCHOOL REGISTERS.

- V. Every school shall be furnished with a record book, in which shall be registered the names, ages, absence and tardiness of each scholar, and the daily average rank in recitation and deportment, and the register shall be open for the inspection of visitors.

## ABSENCE, TARDINESS, DISMISSALS.

- VI. The names of pupils who are habitually absent or tardy shall be reported by the teachers to the parents, the School Committee, and also to the truant officers. In every instance of absence or tardiness a written statement or personal explanation shall be required of the parent or guardian on the return of the pupil to school, or at the next session, that the teacher may know whether the cause is legitimate or otherwise. No pupil shall be allowed to leave school before its dismissal, except for satisfactory reasons, without a written or personal request from parent or guardian.

### SCHOLARS LIMITED TO SCHOOL GROUNDS.

- VII. No pupil shall leave the school-grounds during school hours, except by permission of the teacher.

### CLEANLINESS OF SCHOLARS.

- VIII. Personal cleanliness must be required of every pupil. Teachers are expected to rigidly enforce this rule.

### GOOD MORALS.

- IX. Good morals being of the first importance to the pupils, and essential to their highest progress in useful knowledge, instruction therein shall be given in each of the schools, and the principles of truth and virtue faithfully inculcated upon all suitable occasions. The pupils shall be carefully instructed to avoid idleness and profanity, falsehood and deceit, and every wicked and disgraceful practice, and to conduct themselves in an orderly, courteous and respectful manner; and it shall be the duty of the instructors, so far as practicable, to exercise a general inspection over them, in these regards, both in and out of school, and also while going to the same and returning home.

### VENTILATION.

- X. Teachers shall give special attention to the ventilation and temperature of their school rooms, both in summer and winter, and see that the air is thoroughly changed at each recess and at the close of each school session.

### SUPERVISION OF PRINCIPAL.

- XI. The Principal of the High School shall have general supervision of the buildings and yard in which he teaches, and shall be held responsible for all school property, and for the general discipline of the schools in his building outside their respective rooms. He shall also assist the several teachers, when necessary, in the enforcement of rules of discipline and order; and it shall be the duty of the several teachers to co-operate with him in the discharge of his general duties.

## CARE OF SCHOOL PREMISES.

- XII. Teachers shall be held responsible for any want of decorum or neatness about the school premises, and also for all damage done to the school property in their respective rooms during school hours. Any pupil who shall write any indecent language or draw any obscene or indecent pictures or representations on any part of the school premises shall be liable to expulsion.

## BOOKS AND UTENSILS REQUIRED.

- XIII. Pupils shall not be allowed to attend any of the public schools unless they are furnished with the books and utensils required in the respective classes.

## SUBJECTS TO BE EXPLAINED AND INSTRUCTION TO BE THOROUGH AND PRACTICAL.

- XIV. The teachers are required to illustrate and explain the subjects of study in such language and by such methods of their own as shall find the readiest access to the understanding of the pupils. And the instruction should be thorough, and made practical by showing to the pupils distinctly the various applications to the common affairs of life that may be made of the knowledge they are acquiring at school.

## NON-RESIDENTS.

- XV. Non-residents shall not attend school in any district except by consent of the local committee and the payment of such tuition as shall be determined.

## DETENTION OF PUPILS.

- XVI. No pupils shall be detained in the school room during a full session of the school; if deprived of recess from any cause, a reasonable absence shall be granted sometime during the session.

## GOVERNMENT OF THE SCHOOL.

- XVII. The discipline of the schools shall be of a parental character; such as a kind, judicious and faithful parent would exercise in the family. Corporal punishment shall be resorted to only when all other means fail, and then shall only be administered by the application of a rattan or ferule to the palm of the hand. No teacher shall inflict any punishment whatever on or about the head of any pupil, and no pupil shall be punished by confinement in any closet, ante-room or basement.

## SUSPENSION OF PUPILS.

- XVIII. Scholars will be suspended from school for persistent disobedience, insubordination and gross opposition to authority, and when so suspended will not be allowed to return without permission from the School Committee.

## ABSENCE FOR HALF A TERM.

- XIX. Any pupil who shall from any cause absent himself from school for half a term shall not be allowed to rejoin his class without satisfactory evidence of proficiency in the studies pursued during the absence being presented to the School Committee.

## CONTRIBUTIONS, SUBSCRIPTIONS, ADVERTISEMENTS, &amp;C.

- XX. No contribution or subscription shall be introduced into any school; and no person shall be allowed to occupy the time of a school by giving any notice or advertisement to the pupils or teachers, and no person not connected with the schools, shall be permitted to address the pupils on any subject not pertaining to their studies, except by permission of the School Committee.

## PROMOTION.

- XXI. Promotions will be made at the commencement of the school year, but any pupil who shall excel in scholarship may be promoted at any time upon passing a satisfactory examination by the School Committee. In determining promotions, 70 per cent. of correct answer upon written examinations shall be required for entry to the High School, and for promotion from class to class therein, with a like requirement of 66 per cent. for the Grammar and Intermediate departments, subject to exception only in extreme cases when its enforcement would cause apparent injustice.

## DIPLOMAS.

- XXII. Diplomas shall be awarded at the close of the school year to such pupils of the High School as shall have completed the prescribed course to the satisfaction of the School Committee. Certificates of Graduation will be awarded to all pupils who satisfactorily complete the course of study in the Grammar Schools.

## COPY OF REGULATIONS TO BE KEPT IN SCHOOL.

- XXIII. A copy of these regulations shall be kept upon the desk in each school room, and teachers are required to read them before the school at the commencement of each term, and allow visitors to freely consult the same.
